But as it is, if you log out of an account and try to make a new account, all your decks stay the same and get synced onto the new account.. They do make some UI choices that confuse me though Like, personally it'd be nice if my decks were tied to my account rather than my phone, especially with the whole syncing option; for instance, I have a personal email that I would like to use for just personal projects and random stuff I want to study, and then I have a school email that I'd like to use for just my classes.

com - Share your decks with friends so you can study & learn together — free for everyone!- Keep track of the cards you've learned & save time by only studying those you haven't mastered.. Just throwing ideas at chá;)I'll tell you all why and that is that after some time Apps at the App store no-longer work, are compatible or the developer forgets about it because they can no-longer afford it. Thanks for all you have done to up my gpa Not Quite That GoodThis is an added update to my previous review because I just paid for the upgrade and was hoping for the ability to print as well as the option to change the card color.. - Don't want to create your own? Download flashcard decks made by other students on Cram.. Think chemistry formulas for organic chemistry, paintings for an art history class, anatomy diagrams for biology ... anything you need to memorize quickly.. For instance when I start taking Chinese classes I would rather just make a category named "Chinese" and start making decks in there directly rather than have a random deck named "vocab day 1" floating around that I have to make and then find in my list when making the category.. It's not a huge deal, but it'd just be nice to have the option of keeping separate accounts. 773a7aa168 [Windows 8 Free Download Full Version 32 Bit With Crack](#)
