Screen still works, but is only attached to the watch by some internal wires I figured it'd be a \$100 repair, fair enough.

edit: heard back from one LA repair shop, said the parts alone were \$200 so best to do through Apple.. Apple wants \$250 to fix it!! That's really close to the price of a brand new watch! I'm really unhappy about that, especially four months away what will likely be the series 5 launch.. High quality Apple Watch 2 screen, glass, LCD display HiApple advises that you should not continue using a damaged Apple Watch.. I just need to get it work until the series 5 watch launches Thanks, /u/rchrdrw.. 15 comments

Apple does not offer a screen repair service for Apple Watch If the issue is not due to a manufacturing defect, then your watch may instead be eligible for replacement via chargeable, out-of-warranty service (or via AppleCare+, if previously purchased).. Prices vary by model and region Apple's out-of-warranty repair prices in the US, for example, are detailed here:Contact Apple Support (mail-in service may be available, if required), make a Genius Bar reservation or visit an Apple Authorised Service Provider to arrange for your Apple Watch to be inspected and to establish your available service options: Jun 11, 2017 5:21 AM Posted by1 month agoMy fault, watch dropped, screen separated.. Anyone have luck with local fix it places that can repair watch screens? I haven't found any in LA yet.. But I'm going the 'ifixit' route and seeing if I can take care of it on my end, since the screen still works.. Buy Apple Watch Series 2 Screen Replacement & Repair Kits at the Mobile Parts Leader.
